

BUNKER HILL SUPERFUND SITE

ICP

INSTITUTIONAL CONTROLS PROGRAM

LARGE PROJECTS - EXTERIOR

A Large Project Work Permit is required for exterior work involving any of the following activities:

- Excavation of more than 1 cubic yard of contaminated soil or debris.
- Subdivisions and Planned Unit Developments.
- Building demolition.
- Land clearing activities that expose contaminated material.

PERMIT REQUIREMENTS:

All excavation, grading construction, building demolition and certain building renovation projects within the site must have an approved permit(s) from Panhandle Health District (PHD) and other permit authorities which have jurisdiction over land use issues requiring permit issuance.

In many jurisdictions, the PHD permit must be issued and valid before work permits issued by other entities is valid.

All contractors involved in excavation, grading construction and certain interior projects within the site must be licensed by PHD.

There are no fees associated with contractor licensing or work permits.

INSPECTION:

All work must be inspected by PHD personnel prior to final permit approval. Inspections may be called for by the applicant at prescribed intervals. Lead time for inspections is 48 hours exclusive of holidays and weekends.

TRACKING:

Work activities will be recorded in a database maintained to assist in barrier certification. This information will be used to assist with land transactions.

ICP SERVICES

EDUCATION:

Supply information on where contaminants are and how to avoid exposure. Give advice on how to break existing barriers and how to select and install new ones.

SAMPLE ASSISTANCE:

Identify areas of concern that may need to be sampled and provide information on land use vs. barrier durability.

PHD will collect samples and provide sample analysis when appropriate.

DISPOSAL:

Identify a site for disposal of contaminated soil and debris generated by excavation, demolition and/or construction activity site-wide.

CONTRACTOR LISTING:

Maintain a list of contractors licensed to perform work regulated by the ICP.

TRACK PROJECTS:

Establish and maintain a record of construction activities by property. The information will be available to assist with land transactions within the Bunker Hill Superfund Site.
